Course Description

Incidents that involve animals trapped in Swiftwater and Floodwater require special considerations and knowledge. This partially-funded training is provided through both hands-on and classroom instruction. This rare 2-for-1 class covers both the ASAR Swiftwater Technician skills and the ASAR Floodwater Boat Operations. Small animal rescue techniques will be the primary focus, with additional discussion about large animal issues and hazards in floodwater. Participants need to have the ability to swim in moving water conditions.

Required PPE

- Drysuit
- Water rescue helmet
- Class V PFD with quick release strap
- Water gloves/footwear
- Rentals available
